

## Bespoke Curved Segmented Sofa

Mark from Mark Alexander Design details the process and planning that goes into each of our Australian made sofas, focusing on a luxury curved sofa we recently completed for a client in Sydney.

**Manufacturing Australian Made Curved Sofas**

We work personally with our clients right across Australia to custom design and make the perfect furniture to suit their home and any unique requirements they may have. When crafting our bespoke curved sofas and modular sofas we finalise every little detail with our clients before any manufacturing commences. During manufacturing we use the perfect combination of materials to ensure optimal comfort is achieved with only the highest quality timbers, foams and cushioning used.

# Custom Designed For You

This custom curved sofa design was carefully planned and uniquely designed to sit within the bay window of this client's home with a feature curved rug to be placed in front. Each bespoke sofa is hand crafted with a solid timber frame and premium foams and cushioning for an uncompromising result. Custom designed and made to order to required dimensions, colours and finishes.
